Also that at the present time bonds would require an excessive rate of interest, probably about 6%, which was in excess of what we could afford. Also that if the bond issue was pre sented to the voters the proposition had to stipulate the exact amount of interest offered in order to get bonding companies to take bonds. ### WILL ASK WOMEN TO REGISTER Mrs. O. N. Michelson Presents

WORK IN CHARGE OF NATION-AL DEFENSE SOCIETY.

Held Classes of Instruction in En-

rollment, On Monday evening a mass meeting

for the woman of Crawford county was held in the school auditorium. The chairman of "The Woman's National defense," Mrs. S. N. Insley, asked that all women interested in America as well as in the object of the organization of the Woman's National Defense to attend and listen to a lecture by Mrs. Arthur Plum of Bay

tion. In fact it was quite unusual that 500 women should respond to this call from a place the size of Grayling, patriotic spirit our citizens have.

Mrs. Plum is a very pleasing and convincing speaker. She explained that this registration, which would be held during the week of April 6th, had been authorized by the government and would be carried on thru the Woman's National Defense. That while t was not compulsory that women register, a refusal to do so would be looked on as dislovalty.

#### Registration For Service.

During the several meetings con ducted by Mrs. Plum that lady gave out much information regarding the object of the registration of the women of the country, and some of the requirements. Among the statements made are the following:

Beginning on April 6, the first anniversary of the signing of the declaration of war, a registration of the woman-power of Michigan is to be taken by the Woman's Committee Council of National Defense. This registration will be taken under authority of the Federal government and by proclamation of the governor of Michigan.

This registration of women which has already been taken in New York, the south and with Otsego county on the north, and there is money enough. But the registration contemplates much more than this. Every loyal woman over sixteen is wanted to register. This war is teaching us that national welfare and military efficiency have their roots back in the home and those beneficent social institutions that are the heart of democracy.

So, when a woman says: "There is nothing for me to register for: I have to give every moment of my time to we will answer, "Register for that." and we will try to send her away with vice. the proud feeling that she is serving her country in a most vital way.

Life is a dear thing to offer but when we choose its preservation to that of the preservation of principles of right, we pay very dearly indeed for it.

> We are glad to honor these men who believe this. Grayling has reason to be proud of its service roll. We find among these thirty-five men, eight officers. It is not the honor which has come to these men for which we are gratified, so much as the fact that the boys who have gone out from our schools have proven themselves worthy of honor. Two in particular we would mention. The first is Major E. E. Hartwick, who did not think he had done all that he could, and who the having served with distinction thru one war, offered himself again to his country when he asw its need. The other is Captain Hardin Sweeney, who has risen to each responsibility placed upon him so ably that his promotion is little short of marvelous. Grayling is proud of Hardin Sweeney.

We love to honor all these men, and Illinois, and several other states, is the best way in which to prove our to this beautiful summer resort region nation-wide in its scope. He told a few stories to make everybody happy. Among the most important matters that he stated, that are of special concern to us is the fact that the proposed trunk line road from Mackinaw City to Toledo was to be a part of the great Dixie highway that s to connect the north with the south. In due time this trunk line is sure to be connected by cross country roads and thus this will become a great system of highways. The use of motor trucks will be general among the farmers as well as the city business men Such a trunk line is going to bring inmoney in the cities along the line. Clinton, Okla, Captured by a hostile band of Cheyennes sixty-four years ago, White Horse, a Pawnee Indian oman, has just died here, still a prisoner, although recognized as a member of the Cheyenne tribe. No effort was ever made at a formal exchange of prisoners between the two tribes. She outlived two Chevenne husbands

At the time of the capture the Cheyennes were on the warpath, roving the plains near Omaha, Neb. They met a ouffalo hunt and a battle followed. The

Among the dead the Cheyenne warriors found a little Pawnee girl. Two of the braves were about to kill her when Chief Heap-of-Birds intervened. "Wait, let me look at her," tribal tradi-tion quotes him. The Indians laid down their tomahawks and permitted Head-of-Birds to examine the child. "Don't kill her, she has teeth, she can eat." the chief continued. "She is two years old." So the Cheyenne chief adopted the child

Japan Offers to Land Troops in Siberia If Allies Say the Word.

#### **EMBASSIES LEAVE PETROGRAD**

Traveling Through Bandit-Infested Siberia to Reach Safety-Austria Cannot Break Away From Her Alliance With Germany.

Japan has asked for permission to land troops in Siberia to prevent the vast quantities of munitions and other military stores at Vladivostok and along the lines of the Siberian railroad from falling into the hands of the Germans. It was feared that the Germans might attempt to force the bolsheviki to deliver these stores to the Germans as a part of a peace agreement. Japan announced her willingness to undertake such an expedition by herself or in connection with troops sent by other of the allied na-

While all officials at Washington are silent and disposed to minimize dis-cussion of the subject it is known that exchanges of opinion are going on with the object of a perfect understanding between Japan, the United States and the other co-belligerents which would make the plan of joint action wholly acceptable to all and thoroughly define its extent and duration

Russian representatives at Washington oppose action by the Japanese in Siberia, but the co-belligerents are thoroughly alarmed lest the vast quantities supplies piled up at Vladivostok, bought and paid for with American

Eight died within a few minutes and 200 were taken to hospitals where they sufbeen supplied with gas equipment and with gas shells for the field guns they ed. had never been used, American com-manders feeling that they could not has given the executive committee of brutal and inhuman though that way may be, and the Boches will be given the reichstag are said to be reconciled a taste of their own weapons.

The strain between Austria and Germany is undoubtedly increasing. Austria's refusal to again attack Russia in spite of Germany's renewal of the war against the bolsheviki has increased the tenseness of the situation existing between the two governments, and it was reported that Germany had practically ordered the Austrian government to send troops into Russia, and that Austria had refused. Austria also refuses to continue the war against Roumania so long as there is a possibility of concluding a peace arrangement with that nation. Poor Roumania, cut off from every possible source of assistance from the outside, without munitions or adequate guns can seemingly do nothing more than accept such peace terms as the Huns may offer.

The most encouraging thing for the future of both Roumania and Russia statement made for the governments to the effect that any neace that may be forced upon thes will not be considered as final, and particularly so if such a peace involves the session of any territory to the nations

tions are committed to the terms of no annexations and no indemnities for Germany or her cohorts. To permit Germany to seize the best provinces of Russia would mean simply preparing the German people for a repetition of their attack on the world's freedom in the future.

The speech of Count von Hertling, German imperial chancellor, before the reichstag, in reply to President Wilson's most recent address before congress regarding the war aims of the United States, is not regarded by leaders in the United States or England increasing the chance for peace. Count von Hertling professed acceptance of the four principles of a demo-cratic peace enunciated by President Wilson and disclaimed any intention of conquest but these protestations have not convinced President Wilson and his advisers, it is said, that Germany is ready to forgo ambitions of conquest. Other parts of the chancellor's speech are regarded as conclusive proof that Germany intends retaining control, in one form or another, of nearly all the foreign territory that

she now occupies. Count von Hertling's reference to Belgium is far from satisfactory. While hinting that Germany does not contemplate annexing Belgium, the chancellor proposes to impose conditions which would restrict the freedom of action of the kingdom and place it at the mercy of the Teutonic empire.

The entente point of view was expressed by one distinguished diplomat who declared that you Hertling's speech has effectually closed the door speech has enectually closed the door to further peace talk. "Belgium is a question of honor," he declared. "It cannot be discussed. So long as the enemy refuses to do justice to Belgium they cannot be expected to perform justice in any other instances."

While the long-distance debate between the statesmen of the belligerent countries has been looked upon with approval by leaders of thought in this cash, should full into the hands of the country on the theory that no chance of effecting a peace on terms acceptable to the allies should be overlooked, ing that the continued peace talk may have a harmful effect upon the public morale in the allied countries. has been a determination in Washingsions to delay war preparations for one minute, and the only harmful ef-

They are in nearly all cases on the high ground, and it is these strong defensive positions against which Germany must throw her shock troops in massed battalions. The price these troops will pay for even an attempt to break through will be terrific, and in all probability more than the million men von Hindenburg has prophesied. It is not likely

even the iron discipline of the German

army will withstand such losses.

Possibility of a disagreement be-ween the United States and Spain because of the refusal of the latter ountry to supply certain war materials to General Pershing was remov ed by the signing of an economic agreement, under which General Pershing will get mules, army blankets and other materials from Spain in return for cotton, oil and other commodities from the United States. Success of these negotiations was welcomed by officials in Washington as ability to buy supplies in Spain will save ship tonnage and enable General Pershing to build up his reserve stores more rapidly. The United States was able to bring pressure to bear upon Spain by refusing fuel to Spanish steamers in American

The German invasion of Russia mysteriously slowed up and on March first it was reported from London that the forward movement of the Huns had been stopped on orders from Ber-Petrograd were to the effect that the bolsheviki were preparing to make the hest possible defense of that city if it was attacked.

On February 28 it was reported from Petrograd that the allied ambassadors had left the Russian capital for Si-beria. It is unlikely that they will be able to reach the Pacific coast at Vladivostok in less than close to three weeks, and the probabilities are that they will be seriously molested by the mobs of armed bandits that are roaming the country from the Ural moun tains to beyond Lake Baikal. The bol sheviki have practically no control of any kind beyond the Ural mountains the so-called Siberian republic.

Every report received from Austria indicates that that country would willingly seek peace on any fairly reasonable basis offered by the allies, if it were possible for her to do so, but she is so dominated by German influence that it is hardly possible for her to break away. The hold of Germany is maintained through the Austrian army which has been very largely Ger-manized since the war began.

So it is believed that Austria will have to remain in her unholy partnership despite her war weariness. has lost 3,500,000 men, her food situation is desperate, and the future, even if Germany could win, is dark for her, for a greater Germany would only mean a more impotent Austria, but she cannot break away. ust continue in the war of being stamped on by the nation that has her in its power.

That is how our allies regard the Austrian situation, and is the explanation of their lukewarmness toward the American effort to widen the rift between the kalser and Em peror Carl.

The German socialists have not taken kindly to the German government's attitude toward President Wilson's last peace message. During the de-bate in the reichstag on von Hertling's speech Philipp Scheidemann, socialist took the emperor to task for his reply to the address of the burgomaster of Hamburg, in which the emperor said:

neighboring peoples, but victory for German arms must first be rec

ognized." "The imperial chancellor frankly stated vesterday that he accepted President Wilson's four principles," said Scheidemann. "This declaration is all the more important when one considers that President Wilson emphasized that his principles were accepted everywhere except by the German military and annexationist party. JERSEY IS HEAVY PRODUCER

Milk Scales and Butterfat Test De termine Whether Cow Is Proving Profitable or Not.

The milk scales and the butterfat test tell the story of whether a cow is producing or not. Jerseys have been making and breaking records for production with great rapidity during the past year. More cows are now be ing tested than ever have been in the production is higher than in other vears.

In May, three years ago, a list of Jersey cows on yearly test that were

producing over 50 pounds of butterfat per month was published for the purpose of keeping breeders informed as to the month-by-month production of cows on test. There were 132 cows in the first list. Three years later, May, 1917, saw 487 cows in the 50-pound list. This means that 487 Jersey cows on test were producing at the rate of more than 50 pounds of butterfat, or 60 pounds of butter in that month. present 500 Jersey cows on test are producing at the rate of 600 pounds of butterfat, or 750 pounds of butter pe

TREATMENT OF KICKING COW

Care and Patience Will Effect Cure if Right Methods Are Used-Two Ways of Tying.

Care and patience will cure the kicking cow if the proper methods are employed. One method is to pass a rope or strap with a loop in one end of it around the body of the cow and draw it tight. The cow will usually jump at first, but when she finds she cannot get out of the rope she will stand still. If this method causes the cow to give bloody milk, place the rope or strap behind the udder, and draw it tight as before.

Another method is to hobble the cow by passing the rope around each leg behind the udder, and tving just above the hocks. This method is a dangerous one, however, for the person tying the rope. After these methods have been repeated a few the cow will stand quietly to be milked

The Home of Dependable Furniture

To drive a tank, handle the guns, and weep over the enemy trenches, takes strong nerves, good rich blood, a good stomach, liver and kidneys. When the time comes, the man with red blood in his veins "is up and at it." He has iron nerves for hardships—an interest in his work grips him. That's the way you feel when you have taken a blood and nerve tonic, made up of Blood root, Golden Seal root, Stone root, Cherry bark, and rolled into a sugar-coated tablet and sold in sixty-cent vials by almost all druggists for past fifty years as Dr. Pierce's Golden Medical Discov ery. This tonic, in liquid or tablet form, is just what you need this spring to give you vim, vigor and vitality. At the fag end of a hard winter, no wonder you feel "run-down," blue, out of sorts. Try this "Medical Discovery" of Dr. Pierce's. Don't wait! To-day is the day to begin! A little "pep," and you laugh and live.

The best means to oil the machinery of the body, put tone into the liver, kidneys and circulatory system, is to first practice a good house-cleaning. I know of nothing better as a laxative than a vegetable pill made up of Mayapple, leaves of aloe and jalap. This is commonly sold by all druggists as Dr. Pierce's Pleasant Pellets, and should be taken at least once a week to clear the twenty-five feet of intestines. You will thus clean the system—expel the poisons and keep well. Now is the time to clean house. Give yourself

er almost universal feature of new coats is some sort of definition at the waistline which may be either above or below the normal waistline and is oftenmost above. Nevertheless, many of the new coats achieve an almost straight silhouette. Bearing these three peculiarities in mind, it will not be at all hard to acquire an up-to-date coat, for spring styles show no radical departures from those of the winter,

Although the throw is merely a supplement to the spring cont for wear on keen, chilly days, it may be made a style note full of charm. There is a knack in wearing it which all lies in adjusting it becomingly. Each of the wo conts illustrated here is provided with a throw and one of them is further favored with one phase of the gauntlet cuff. About midafternoon the Bowser premses were invaded by three or four trange men. Two of them brought ladders and the others cans of paint and jugs of turpentine and oil. Mrs. Bowser when she had recovered a little from the invasion tried to make the men understand that they had unde a big mistake.

"Oh, no, Mrs. Bowser," replied the leader of the gang. "I have known Mr. Bowser for three years and I've been by this place a thousand times. There is no mistake here,"

Mr. Bowser came down the ladder and surveyed the house from the sidewalk. His art work was just boss no landscape painter could have equaled it. The sign on the fence was simply magnificent. The half a dozen people who passed and repassed Mr. Bowser didn't utter a word of praise. In fact, some of them sniggered with contempt. This was scarcely noticed by the great painter, and he went back to his work highly elated. The stripes n the opposite chimney were reversed. Instead of beginning with dark blue he began with red. Just as he had flu-ished and was about to take another survey a man came along' and produced a piece of chalk from his pocket and made the sign read, "The Bowser Villain." Then he called up: "Hello, old man, is the villain at

If Mrs. Bowser had not had a sweet temper she would have spent the rest of the afternoon in kicking over chairs and discharging the cook. Mr. Bowser hadn't said a word about re-painting the house. He had preserved the strictest secrecy about the enter-prise. The house did not need repainting and the idea of having him daubing around for a week or two was unbearable. She made no outright demonstrations, however, but that eve ning would bring the talk.

Mr. Bowser came home at the usual time and took a look into the side vard before entering the house. In fact, he did all the talking during the dinner and a great deal more than was necessary. He was putting the explana-tion off as long as possible, but it had to come when they reached the famlly room.

"Now, then," said Mrs. Bowser, as she straightened up and set her jaw, why did you have those men bring

"Why, my dear," said Mr. Bowser, in an oily voice, "I am going to do a little painting. Didn't I speak about it a week or so ago? This is glorious weather for outside painting and I im anxious to be at the work.

Mrs. Bowser,

"You may not think so, but thouands of other people do. I am almost ashamed to turn at the gate and look at it. Besides, I have an other object in view. How long have ve lived in this house?"

"About fifteen years," was the reply. "And it has been of the same color ever since. The house is red brick and the woodwork painted white. That's the way most of the houses on the block are. "There shall be a complete change my dear. You won't know the place when I get through with it, know what a villa is, don't you? Well, there is not a villa within half a mile of us. I am going to make one of our house."

"Are you going to get a bunch of all to pieces?" was demanded.

## DISEASES OF CROPS CAUSE BIG LOSS

Lessons of Past Indicate Need of Controlling Preventable Troubles,

**OATS SMUT IS UNNECESSARY** 

Can Easily Be Guarded Against, M. A. C. Man says-Same Is True of Wheat Smut and Potato Troubles.

By DR. G. H. COONS, Plant Pathologist, Michigan Agricultural College.

East Lansing, Mich.—The farmer is facing, as never before, high and alsary materials and implements of his business. The problem of farm labor has been only partially solved. How can the farmer then answer the ever greater production?

Those familiar with the losses caused by plant diseases recognize in these losses the great leak in agriculture. Here if anywhere the farmer should concentrate his attention, and by a little effort and by a study of the facts that directly concern his business learn to prevent these losses which year after year have been cutting down yields.

The methods the farmer is to use are ot some new-fangled things manufactured on the spur of the moment but are standard, well-known and thoroughly tested treatments, which through ignorance or carelessness are

ow often widely neglected.

To meet the situation squarely the farmer must know the nature of the trouble he is trying to correct. Plant diseases for the most part are caused by parasites, so tiny as to be invisible except under a microscope, which steal their living from the farmer's crops. sites may cause only a spot or a blemish on the plant, as for example, the scab of potatoes and the "speckles" on apples. With other parasites, the destruction may be complete. In oat smut and late blight of potatoes for instance the crop shows the effect of the attack by diminished yields

In carrying out the program for crop protection, which this article proposes, the most necessary thing for the farmer are not beyond control just because

Let us suppose that the farmer is a proposition that plant disease control can increase his production. Some of the greatest wastes on many farms are those which result from smutsing smut of wheat. By conservative estimate the average loss from oats smut has been placed at about \$5 per acre for the Michigan crop. This amounts in the aggregate to an enormous sum. The average farmer who neglects to treat his seed feeds the smat parasites in his ten acres as much as would be required to keep a cow for

three months. The remedy for this situation is well known and has been pushed in many farming communities. Last year in Michigan the county agricultural agents success the new concentrated formaldehyde solution is sprayed on the grain treated grain is covered for four hours and is then spread out in a warm place to air. It should be planted at ouce. With a cost of from 30 to 50 cents for ture of time and labor it will be seen

that any farmer can protect his crop.
Similar treatment to this is possible for wheat smut, which also is the cause shortage. This loss, which the farmer must stand, is enormous. A common element of good business judgement.

There are weapons also that the potawith corrosive sublimate against black scurf and scab guards against failure of plantings and insures a clean crop if the tubers are planted on clean ground.

In spraying the potato crop with ordenux mixture, the grower has an not only insure his crop against late blight but will prevent the parching of

The fruit grower, if he is at all pro-

The farmer or fruit grower needs to study the requirements of his business. No field of study will yield better re-furns than a consideration of the diseases of our important crops. With such a study will come a realization of the things to be laid in so that materials may be obtained in due season for use in the summer at the critical

times for crop conservation. Formaldehyde, commonly readily obtainable at drug stores, is scarce and should be bought in proper quantity before the great demand which is sure to come this year exhausts the available supply. An early demand will equip the dealer to handle the bus-Similarly, other fungicides, such as copper sulphate for bordeaux mixture, lime sulphur for use against apple scab, and corrosive sublimate for potato scab and black scurf are hard to obtain and should be ordered at once. To delay securing these necessary materials or the necessary insecticides such as arsenicals and nicotine, is to inmand has exhausted the available supply. Nothing but foresight will meet the crisis which our congested trans-

portution conditions present. Spraying machinery too is most important in this year when we plan to rotect our crops with properly made fungicides and insecticides. To insure even June deliveries orders should be placed at once.

Michigan has a number of excellentthy and dependable spray machines. Local freight is moving fairly rapidly and accordingly it would seem the part of good judgment to order goods from true of sprays materials, many of which can be bought in quantity from Michigan concerns.

Preparedness for the battle which confronts the American farmer de-mands attention to the serious plant diseases. The great gains in agricul-ture will not come to much from discovery of new and especially productive varieties as from the greater sav-ing of the crop from the ravages of insect pests and plant diseases. The American farmer army must be prepared if it is to win this impending

Hinse the cup in which the yeast twas mixed with another tablespoon of water and add to the potato. If dry yeast the sused let it stand until morning, Next add the salt, the sugar and i cupful of the flour, sifted. Mix thoroughly, Set in a warm place and let rise until very light, this will take about two hours. When very light, add the remainder of the flour, kneading thoroughly, until a smooth and elastic dough has been formed. Add more flour if necessary to form a hard loaf. (If moist potatoes are used more flour must be kneaded into the dough at this stage.) The dough must be very stiff, since the boiled potato contains a large amount of water, which causes the dough to soften as it ferments. Set back to rise until it has trebled in volume, which will require another hour or two. Divide the dough into four ments, set back to rise until it has treb-ied in volume, which will require another hour or two. Divide the dough into four parts, mold them separately, and place in greased pans which have been warmed slightly. Allow the loaves to rise until they have doubled in volume and bake for 45 minutes.
